

# Solução

Se ao atualizar o Quality Manager para a versão 2.61.1 e no log apresentar o erro abaixo:

```
tail -fn 1000 /var/lib/tomcat9/logs/catalina.out
```

```
[2022-10-20 07:02:23] [warning] Caused by: org.flywaydb.core.internal.command.DbMigrate$FlywayMigrateException: Migration V0085__61_0_C
ampoPepRelatorioConsultaTitulares.sql failed

[2022-10-20 07:02:23] [warning] IF NOT EXISTS (select * from SRV_CAMPOS_RELATORIO_CONSULTA_TITULARES WHERE des_campos_relatorio_con
sulta_titulares = 'Exposta Politicamente' ) THEN
```

Execute os seguintes comandos para solucionar o problema:

```
psql -h 127.0.0.1 -d qualitymanager \
-U md2net \
-c "delete from srv_ordem_abas_relatorio_consulta_titulares where
id_abas_relatorio_consulta_titulares = 95;"
```

```
psql -h 127.0.0.1 -d qualitymanager \
-U md2net \
-c "delete from SRV_ABAS_RELATORIO_CONSULTA_TITULARES where
seq_abas_relatorio_consulta_titulares = 95;"
```

Após executar os comandos acima, será necessário reiniciar o serviço do Tomcat:

```
sudo systemctl restart tomcat9.service
```
